REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Members of Gulfstream Natural Gas System, L.L.C.

We have audited the balance sheets of Gulfstream Natural Gas System, L.L.C. (the "Company") as of December 31, 2016 and 2015, and the related statements of operations, comprehensive income, cash flows and members' equity for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of Gulfstream Natural Gas System, L.L.C. as of December 31, 2016 and 2015, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

GULFSTREAM NATURAL GAS SYSTEM, L.L.C.
Notes to Financial Statements

1. Summary of Operations and Significant Accounting Policies

Nature of Operations. Gulfstream Natural Gas System, L.L.C. (collectively, “we”, “our”, “us” and “company”) owns an interstate natural gas pipeline system and is owned 50% by Spectra Energy Partners, LP (Spectra Energy Partners), and 50% by Williams Partners, L.P. (Williams Partners). We are operated under joint management by Spectra Energy Corp (Spectra Energy), which provides the business functions, and The Williams Companies, Inc. (Williams), which provides the technical functions. We transport natural gas that we receive from various onshore and offshore supply sources in the Mississippi and Alabama area, across the Gulf of Mexico, and deliver that natural gas to markets in central and southern Florida. Our interstate natural gas transmission operations are subject to the rules and regulations of the Federal Energy Regulatory Commission (FERC). We were formed on May 17, 1999 as a Delaware limited liability company.

On September 6, 2016, Spectra Energy announced that they entered into a definitive merger agreement with Enbridge Inc. (Enbridge). Under this agreement, Enbridge and Spectra Energy will combine in a stock-for-stock merger transaction, which values Spectra Energy's stock at approximately \$28 billion, based on the closing price of Enbridge common shares as of September 2, 2016. This transaction was approved by the boards of directors and shareholders of both Spectra Energy and Enbridge, and is expected to close in the first quarter of 2017, subject to certain regulatory approvals and other customary conditions.

Upon completion of the proposed merger, Spectra Energy shareholders will receive 0.984 Enbridge common shares for each share of Spectra Energy stock they own. The consideration to be received is valued at \$40.33 per Spectra Energy share, based on the closing price of Enbridge common shares as of September 2, 2016, representing an approximate 11.5% premium to the closing price of Spectra Energy stock as of September 2, 2016. Upon completion of the merger, Enbridge shareholders are expected to own approximately 57% of the combined company and Spectra Energy shareholders are expected to own approximately 43%.

As a result of this transaction, Enbridge and its subsidiaries will collectively own the interest in us currently held by Spectra Energy.

Basis of Presentation. The financial statements reflect the results of operations, financial position and cash flows of our company. The financial statements do not include any of the assets, liabilities, revenues or expenses of the members.

Use of Estimates. To conform with generally accepted accounting principles (GAAP) in the United States, we make estimates and assumptions that affect the amounts reported in the Financial Statements and Notes to Financial Statements. Although these estimates are based on our best available knowledge at the time, actual results could differ.

Fair Value Measurements. We measure the fair value of financial assets and liabilities by maximizing the use of observable inputs and minimizing the use of unobservable inputs. Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Cost-Based Regulation. The economic effects of regulation can result in a regulated company recording assets for costs that have been or are expected to be approved for recovery from customers or recording liabilities for amounts that are expected to be returned to customers or for instances where the regulator provides current rates that are intended to recover costs that are expected to be incurred in the future. Accordingly, we record assets and liabilities that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. We continually assess whether regulatory assets are probable of future recovery by considering factors such as applicable regulatory changes and recent rate orders to other regulated entities. Based on this assessment, we believe our existing regulatory assets are probable of recovery. These regulatory assets are classified in the Balance Sheets as Regulatory Assets and Deferred Debits. We evaluate our regulated assets and consider factors such as regulatory changes and the effect of competition. If cost-based regulation ends or competition increases, we may have to reduce our asset balances to reflect a market basis less than cost and write-off the associated regulatory assets and liabilities. See Note 3 for further discussion.

Revenue Recognition. Revenues from the transportation of natural gas are recognized when the service is provided. Revenues related to these services provided but not yet billed are estimated each month. These estimates are generally based on contract data, regulatory information and preliminary throughput and allocation measurements. Final bills for the current month are billed and collected in the following month. Differences between actual and estimated revenues are immaterial.

Customers accounting for 10% or more of revenues during 2016, 2015 and 2014 are as follows:

Customer	% of Revenues		
	2016	2015	2014
Nextera Energy, Inc.....	52%	52%	52%
Duke Energy Florida, Inc.....	34	34	30

Allowance for Funds Used During Construction (AFUDC). AFUDC, which represents the estimated debt and equity costs of capital funds necessary to finance the construction and expansion of certain new regulated facilities, consists of two components, an equity component and an interest expense component. The equity component is a non-cash item. After construction is completed, we are permitted to recover these costs through inclusion in the rate base and in the depreciation provision. AFUDC is capitalized as a component of Property, Plant and Equipment cost in the Balance Sheets, with offsetting credits to the Statements of Operations through Other Income and Expenses, Net for the equity component and Interest Expense for the interest expense component. There was no material AFUDC recognized for 2016, 2015 and 2014.

Income Taxes. We are not subject to federal income taxes, but rather our taxable income or loss is reported on the income tax returns of our members. We are subject to cost-based regulation and consequently record a regulatory tax asset in connection with the tax gross up of AFUDC equity. The corresponding deferred tax liability is recognized as an Attributed Deferred Tax Benefit in the Statements of Members' Equity since we are a pass-through entity.

Cash and Cash Equivalents. Highly liquid investments with original maturities of three months or less at the date of acquisition are considered cash equivalents.

Inventory. Inventory consists mainly of natural gas retained from shippers for fuel and also includes materials and supplies. Natural gas is recorded at the lower of cost or market. Materials and supplies are recorded at cost, using the average cost method.

Cash Flow Hedges. In 2005, we entered into derivative transactions that are hedges of the future cash flows of forecasted transactions (cash flow hedges). We are exposed to the impact of market fluctuations in interest rates. To protect from increasing interest rates and the resulting higher cost of the debt that was issued in 2005, we locked in existing interest rates by using financial derivatives (swaps) for hedge strategies. The associated interest rate swaps were terminated on October 12, 2005, prior to the issuance of the related debt. These derivatives were initially recorded on the Balance Sheets at their fair value as Accumulated Other Comprehensive Income (AOCI). Deferred gains of \$3.6 million in AOCI as of December 31, 2016 will continue to be amortized to interest expense over the term of the debt issued. The total amortization was \$0.4 million in 2016, \$1.1 million in 2015 and \$1.3 million in 2014.

Changes in the fair value of a derivative designated and qualified as a cash flow hedge, to the extent effective, are included in Statements of Members' Equity and Comprehensive Income as AOCI until earnings are affected by the hedged transaction. We discontinue hedge accounting prospectively when it is determined that a derivative no longer qualifies as an effective hedge, or when it is no longer probable that the hedged forecasted transaction will occur. When hedge accounting is discontinued because the derivative no longer qualifies as an effective hedge, the derivative is subject to the mark-to-market model of accounting prospectively. Gains and losses related to discontinued hedges that were previously accumulated in AOCI will remain in AOCI until the underlying contract is reflected in earnings; unless it is probable that the hedged forecasted transaction will not occur at which time associated deferred amounts in AOCI are immediately recognized in current earnings. All derivatives designated and accounted for as hedges are classified in the same category as the item being hedged in the Statements of Cash Flows. In addition, all components of each derivative gain or loss are included in the assessment of hedge effectiveness.

When available, quoted market prices or prices obtained through external sources are used to measure a contract's fair value.

Property, Plant and Equipment. Property, plant and equipment is stated at historical cost less accumulated depreciation. We capitalize all construction-related direct labor and material costs, as well as indirect construction costs. Indirect costs include general engineering, taxes, administrative and general costs, and the cost of funds used during construction. The costs of renewals and betterments that extend the useful life or increase the expected output of property, plant and equipment are also

capitalized. The costs of repairs, replacements and major maintenance projects that do not extend the useful life or increase the expected output of property, plant and equipment are expensed as incurred. Depreciation is generally computed over the asset's estimated useful life using the straight-line method.

When we retire property, plant and equipment, we charge the original cost plus the cost of retirement, less salvage value, to accumulated depreciation and amortization. When we sell entire regulated operating units, or retire or sell certain non-regulated properties, the cost is removed from the property account and the related accumulated depreciation and amortization accounts are reduced. Any gain or loss is recorded in earnings, unless otherwise required by FERC.

Preliminary Project Costs. Project development costs, including expenditures for preliminary surveys, plans, investigations, environmental studies, regulatory applications and other costs incurred for the purpose of determining the feasibility of capital expansion projects, are capitalized when it is determined that recovery of such costs through regulated revenues of the completed project is probable. Any inception-to-date costs of the projects that were initially expensed are reversed and capitalized as Property, Plant and Equipment.

Long-Lived Asset Impairments. We evaluate whether long-lived assets, excluding goodwill, have been impaired when circumstances indicate the carrying value of those assets may not be recoverable. For such long-lived assets, an impairment exists when its carrying value exceeds the sum of estimates of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. When alternative courses of action to recover the carrying amount of a long-lived asset are under consideration, a probability-weighted approach is used in developing estimates of future undiscounted cash flows. If the carrying value of the long-lived asset is not recoverable based on these estimated future undiscounted cash flows, an impairment loss is measured as the excess of the asset's carrying value over its fair value, such that the asset's carrying value is adjusted to its estimated fair value.

We assess the fair value of long-lived assets using commonly accepted techniques, and may use more than one source. Sources to determine fair value include, but are not limited to, recent third-party comparable sales, internally developed discounted cash flow analyses and analyses from outside advisors. Significant changes in market conditions resulting from events such as changes in natural gas available to our systems, the condition of an asset, a change in our intent to utilize the asset or a significant change in contracted revenues or regulatory recoveries would generally require us to reassess the cash flows related to the long-lived assets.

Asset Retirement Obligations (AROs). We have determined that substantially all of our assets have an indeterminate life, and as such, the fair values of those AROs are not reasonably estimable. These assets include pipelines whose retirement dates will depend mostly on the various natural gas supply sources that connect to our systems and the ongoing demand for natural gas usage in the markets we serve. We expect these supply sources and market demands to continue for the foreseeable future, therefore we are unable to estimate retirement dates that would result in AROs.

Unamortized Debt Expense. Debt expenses incurred with the issuance of outstanding long-term debt are amortized over the terms of the debt issued. Any call premiums or unamortized expenses associated with refinancing higher-cost debt obligations to finance regulated assets and operations are amortized consistent with regulatory treatment of those items, where appropriate.

New Accounting Pronouncements. There were no significant accounting pronouncements adopted during 2016.

Pending. The following new Accounting Standards Updates (ASUs) were issued but not adopted as of December 31, 2016:

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU No. 2014-09, "*Revenue from Contracts with Customers (Topic 606)*," in an effort to improve revenue recognition practices across entities and industries. The ASU introduces a single, principle-based revenue recognition model which centers on the core principle of an entity recognizing revenue in a manner that depicts the transfer of goods and services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. Since its release, the FASB has issued multiple amendments clarifying and/or amending ASU No. 2014-09. We have substantially completed a review of contracts with customers in relation to the requirements of ASU No. 2014-09. While we have not identified any material difference in the amount or timing of revenue recognition for the categories we have reviewed to date, our evaluation is not complete and we have not concluded on the overall impacts of adopting this standard. In addition, we are in the process of implementing appropriate changes to our business processes, systems and controls to support the recognition and disclosure requirements under the new standard. ASU No. 2014-09 is effective for us January 1, 2018 and allows for either full retrospective or modified retrospective adoption.

In July 2015, the FASB issued ASU No. 2015-11, *“Inventory (Topic 330): Simplifying the Measurement of Inventory,”* which simplifies the subsequent measurement of inventory by requiring inventory to be measured at the lower of cost and net realizable value. This ASU is effective for us January 1, 2017. This ASU is not expected to have a material impact on our results of operations, financial position, or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, *“Leases (Topic 842),”* to improve the financial reporting around leasing transactions. The new guidance requires companies to begin recording assets and liabilities arising from those leases classified as operating leases under previous guidance. Furthermore, the new guidance will require significant additional disclosures about the amount, timing and uncertainty of cash flows from leases. Topic 842 retains a distinction between finance leases and operating leases. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the classification criteria for distinguishing between capital leases and operating leases in previous guidance. The result of retaining a distinction between finance leases and operating leases is that under the lessee accounting model in Topic 842, the effect of leases in the statement of comprehensive income and the statement of cash flows is largely unchanged from previous guidance. This ASU is effective for us January 1, 2019. We are currently evaluating this ASU and its potential impact on us.

In August 2016, the FASB issued ASU No. 2016-15, *“Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments,”* to provide guidance on specific cash flow issues with the objective of reducing the existing diversity in practice. This ASU is effective for us on January 1, 2018. We are currently evaluating this ASU and its potential impact on us.

In November 2016, the FASB issued ASU No. 2016-18, *“Statement of Cash Flows (Topic 230): Restricted Cash,”* to address the diversity in the classification and presentation of changes in restricted cash and restricted cash equivalents on the statement of cash flows. The update requires that restricted cash and restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. This ASU is effective for us on January 1, 2018. We are currently evaluating this ASU and its potential impact on us.

The following ASU was adopted in 2015 and the effects of such adoption, if any, are presented in the accompanying Financial Statements:

In April 2015, the FASB issued ASU No. 2015-03, *“Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs,”* which requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability, rather than as a deferred charge asset. We adopted the provisions of this ASU as of December 31, 2015. The adoption of this ASU resulted in the presentation of \$9.2 million of debt issuance costs as a reduction of Long-term Debt on our December 31, 2015 Balance Sheet.

There were no significant accounting pronouncements issued during 2014 that had a material impact on our results of operations, financial position or cash flows.

2. Transactions with Affiliates

Gulfstream Management & Operating Services, L.L.C. (GMOS), owned 50% by Spectra Energy Partners and 50% by Williams Partners, provides management, construction and operating services pursuant to agreements entered into with us and with affiliates of Spectra Energy and Williams. GMOS bills us for services rendered including labor and benefit costs, employee expenses, overhead costs and in some cases, third-party costs. Such amounts are reflected in the Statements of Operations as Operating, Maintenance and Other — Affiliates or in the Balance Sheets as Property, Plant and Equipment, as appropriate.

Transactions with affiliates are summarized in the tables below:

Statements of Operations

	<u>2016</u>	<u>2015</u>	<u>2014</u>
	(in millions)		
Operating, maintenance and other — affiliates.....	\$ 17.4	\$ 17.0	\$ 19.4

Balance Sheets

	<u>December 31,</u>	
	<u>2016</u>	<u>2015</u>
	(in millions)	
Receivables — affiliates	\$ —	\$ 297.4
Current assets — other	1.6	1.7
Accounts payable — affiliates	1.3	1.3
Current liabilities — other	6.1	—

Transactions billed from affiliates, included within Property, Plant and Equipment in the Balance Sheets, were \$0.7 million in 2016 and \$0.5 million in 2015.

3. Regulatory Matters

Regulatory Assets and Liabilities. We record assets and liabilities that result from the regulated ratemaking process that would not be recorded under GAAP for non-regulated entities. See Note 1 for further discussion.

Regulatory Assets and Liabilities

	December 31,		Recovery/Refund Period Ends
	2016	2015	
	(in millions)		
Regulatory Assets (a)			
Regulatory asset related to income taxes (b).....	\$ 21.4	\$ 21.8	(c)
Total Regulatory Assets.....	\$ 21.4	\$ 21.8	
Regulatory Liabilities (a)			
Fuel tracker.....	\$ —	\$ 2.4	
Total Regulatory Liabilities.....	\$ —	\$ 2.4	

(a) All regulatory assets and liabilities are excluded from rate base.

(b) Relates to tax gross-up of AFUDC equity portion and is included in Regulatory Assets and Deferred Debits.

(c) Amortized over the life of the related property, plant and equipment.

Rate Related Information. We continue to operate under rates approved by the FERC in 2007.

4. Property, Plant and Equipment

	Estimated Useful Life (years)	December 31,	
		2016	2015
		(in millions)	
Plant			
Natural gas transmission.....	60	\$ 1,884.0	\$ 1,888.2

Current maturities of long-term debt.....		<u>0.1</u>	<u>299.9</u>
Total long-term debt.....		<u>\$ 1,140.5</u>	<u>\$ 1,139.8</u>

All scheduled debt payments correspond to the year due.

On September 24, 2015, we issued \$800.0 million aggregate principal amount of senior unsecured notes, comprised of \$550.0 million of 4.60% senior notes due in 2025 and \$250.0 million of 5.95% senior notes due in 2045. Total net proceeds of \$793.0 million was advanced to our members, based on their ownership percentages, to be returned to us to fund the repayment of our current debt as it matured. Our members returned \$495.6 million in the fourth quarter of 2015 and the remaining \$297.4 million was returned in the second quarter of 2016.

6. Fair Value Measurements

The following table presents, for each of the fair value hierarchy levels, assets that are measured at fair value on a recurring basis:

Description	Balance Sheet Caption	December 31, 2016			
		Total	Level 1	Level 2	Level 3
(in millions)					
Short-term money market securities	Cash and cash equivalents...	\$ 5.5	\$ 5.5	\$ —	\$ —
Total Assets.....		<u>\$ 5.5</u>	<u>\$ 5.5</u>	<u>\$ —</u>	<u>\$ —</u>

Description	Balance Sheet Caption	December 31, 2015			
		Total	Level 1	Level 2	Level 3
(in millions)					
Short-term money market securities	Cash and cash equivalents...	\$ 20.9	\$ 20.9	\$ —	\$ —
Total Assets.....		<u>\$ 20.9</u>	<u>\$ 20.9</u>	<u>\$ —</u>	<u>\$ —</u>

Level 1 valuations represent quoted unadjusted prices for identical instruments in active markets.

Financial Instruments. The fair value of financial instruments that are recorded and carried at book value are summarized in the following table. Judgment is required in interpreting market data to develop the estimates of fair value. These estimates are not necessarily indicative of the amounts we could have realized in current markets. The fair value of long-term debt represents a level 2 valuation which is determined based on market-based prices which may include inputs such as quoted market prices of the exact or similar instruments, broker or dealer quotations, or alternative pricing sources that may include models or matrix pricing tools, with reasonable levels of price transparency.

	December 31,			
	2016		2015	
	Book Value	Approximate Fair Value	Book Value	Approximate Fair Value
(in millions)				
Long-term debt, including current maturities (a)	\$ 1,150.0	\$ 1,237.2	\$ 1,450.0	\$ 1,439.6

(a) Excludes unamortized items

The fair value of cash and cash equivalents, accounts receivable, and accounts payable are not materially different from their carrying amounts because of the short-term nature of these instruments or because the stated rates approximate market rates.

During the 2016 and 2015 periods, there were no adjustments to assets measured at fair value on a nonrecurring basis.

7. Credit Risk

Our principal customers for natural gas transmission services are utilities located throughout the state of Florida. We have concentrations of receivables from the utility sector in the state of Florida. These concentrations of customers may affect our overall credit risk in that risk factors can negatively affect the credit quality of the entire sector. Where exposed to credit risk, we analyze the customers' financial condition prior to entering into an agreement, establish credit limits and monitor the appropriateness of those limits on an ongoing basis. We also obtain parental guarantees, cash deposits or letters of credit from customers to provide credit support, where appropriate, based on our financial analysis of the customer and the regulatory or contractual terms and conditions applicable to each agreement.

8. Commitments and Contingencies

General Insurance. We carry, either independently or through our owners, insurance consistent with companies engaged in similar commercial operations with similar type properties. Our insurance program includes (1) commercial general and excess liability insurance for liabilities to third parties for bodily injury and property damage resulting from our operations; (2) workers' compensation liability coverage to required statutory limits; (3) automobile liability insurance for all owned, non-owned and hired vehicles covering liabilities to third parties for bodily injury and property damage; and (4) onshore replacement value property insurance, including machinery breakdown, business interruption and extra expense. All coverages are subject to certain deductibles, terms, exclusions, and conditions common for companies with similar types of operations.

Environmental. We are subject to various federal, state and local laws and regulations regarding air and water quality, hazardous and solid waste disposal and other environmental matters. These laws and regulations can change from time to time, imposing new obligations on us.

Like others in the energy industry, we and our affiliates may be responsible for environmental remediation at various contaminated sites. These include some properties that are part of our ongoing operations, sites formerly owned or used by us, and sites owned by third parties. Remediation typically involves management of contaminated soils and may involve groundwater remediation. Managed in conjunction with relevant federal, state/provincial and local agencies, activities vary with site conditions and locations, remedial requirements, complexity and sharing of responsibility. If remediation activities involve statutory joint and several liability provisions, strict liability, or cost recovery or contribution actions, we or our affiliates could potentially be held responsible for contamination caused by other parties. In some instances, we may share liability associated with contamination with other potentially responsible parties, and may also benefit from contractual indemnities that cover some or all cleanup costs. All of these sites generally are managed in the normal course of business or affiliated operations.

Litigation. We are involved in legal, tax and regulatory proceedings in various forums arising in the ordinary course of business, including matters regarding contracts and payment claims, some of which may involve substantial monetary amounts. We have insurance for certain of these losses should they be incurred. We believe that the final disposition of these proceedings will not have a material adverse effect on our results of operations, financial position or cash flows.

Legal costs related to the defense of loss contingencies are expensed as incurred. We had no material reserves for legal matters recorded as of December 31, 2016 or 2015 related to litigation.

9. Subsequent Event

We have evaluated significant events and transactions that occurred from January 1, 2017 through February 22, 2017 the date the financial statements were issued.

A distribution to members of \$21.7 million was declared on January 19, 2017 and paid on January 30, 2017.
